GitHub Repo: <https://github.com/zulfiya-yumagulova/news-app>

Demo: <https://fresh-news-app.netlify.app>

- Fetched data by using public API.
- Used React library for creating components.
- Styled all components to achieve fully response and adapted web site for the different screen sizes.
- Wrote unit tests to test React components.
- Deployed on Netlify.

Team Projects

SalVeg

During 4 weeks project in School of Code my team worked closely to deliver a real live project. It gave us a better understanding of how in real the applications or websites can be developed with different designing techniques and tools.

GitHub Repo: <https://github.com/zulfiya-yumagulova/final-project-api-six-bits>

Demo: <https://salveg.netlify.app/>

- A whole team planned our app, design, what tools to use, logo.
- Maintained and developed UI/UX design.
- Helped to make website responsible for tablets and mobiles.
- Worked with other developers to implement RESTful APIs in Node.js.
- Implemented CRUD.
- Used PostgreSQL database and Heroku cloud.
- Used Auth0 to make users able to sign in securely.
- Had regular code review and kept it on track.
- Worked in Agile methodology.
- Performed testing at the page using Cypress.

PinIt

The app helps an user keep all needed links in one place. In this project I worked in front end to deliver modern client side.

GitHub Repo:

<https://github.com/zulfiya-yumagulova/national-project-week-professional-artists/tree/main>

Demo: <https://pinitapp.netlify.app/>

- Collaborated with the team to create design and logo using Figma.
- Researched tools to improve web design.
- Used React for front end.
- Developed React components for website.
- Worked with another developer to style components.
- Helped to connect front end with back end.
- Followed team's MVP.

Education

School of Code

NOVEMBER 2021 – MARCH 2022

Trained to industry standards through extensive focus on the fundamentals of software development, problem solving, pair-programming and agile project management. Regularly participated in hackathons and independent exploration into new technology by embracing challenges and pushing myself out of my comfort zone.
