

# Zulfiya Yumagulova

Full Stack Developer

## Profile

Web Developer with a passion for tech, web design, developing modern applications and success in managing development projects using Scrum and Agile methodologies. I am confident in problem solving, pair programming and communicating with clients or team.

## Employment History

Senior Hair Stylist, Self Employed , London

JUNE 2015 - MAY 2021

- Delivered excellent customer service.
- Researched market trends, celebrity styles and other popular looks to provide clients excellent service.
- Prioritised customer service during off-hours, including working weekends and providing in-house visits.
- Regularly upgraded my professional skills by visiting courses.

**Intern Front End Developer, Davydov Consulting**

JUNE 2021 - APRIL 2022

- Worked closely with project manager and product designer to build modern and responsive web sites.
- Developed dynamic web sites from scratch using HTML, CSS, JavaScript, React.
- Performed bug fixes and daily code review.
- Worked well in pair programming.
- Prepared web site presentations.

## Single Projects

### Full Stack Todo List

Full stack Todo app where a user is able to post his todos, edit, read them and delete.

#### GitHub

- Used Node.js for the back, to create a sever.
- Created RESTfull APIs.
- Implemented CRUD (Create, Read, Update, Delete) operations to allow the user to work with the data stored in PostgreSQL using Heroku cloud.
- Chose React library for the client side.
- Created components in React and styled them.
- Connected front end with back end, fetching data from data base.

### News App

The News app where a user can find fresh daily news by searching needed category.

#### Demo Repo

- Fetched data from public API.
- Used .env file to use API\_KEY and added that file to .gitignore to secure.

## Details

195 Uxbridge Rd.  
TW12 1AX, London  
United Kingdom

## Skills

HTML

CSS

JavaScript

Node.js

Express.js

PostgreSQL

React.js

Heroku

Netlify

GitHub

- Used React library for creating components.
- Styled all components to achieve fully responsive and adapted web site for the different screen sizes.
- Wrote unit tests to test React components.
- Deployed on Netlify.

## Team Projects

### SalVeg

During 4 weeks project in School of Code my team worked closely to deliver a real live project. It gave us a better understanding of how real applications or websites can be developed with different designing techniques and tools.

#### GitHub Repo

#### Demo

- A whole team planned our app, design, what tools to use, logo.
- Maintained and developed UI/UX design.
- Helped to make website responsible for tablets and mobiles.
- Worked with other developers to implement RESTful APIs in Node.js.
- Implemented CRUD.
- Used PostgreSQL database and Heroku cloud.
- Used Auth0 to make users able to sign in securely.
- Had regular code review and kept it on track.
- Worked in Agile methodology.
- Performed testing at the page using Cypress.

### PinIt

The app helps an user keep all needed links in one place. In this project I worked in front end to deliver modern client side.

#### GitHub Repo

#### Demo

- Collaborated with the team to create design and logo using Figma.
- Researched tools to improve web design.
- Used React for front end.
- Developed React components for website.
- Worked with another developer to style components.
- Helped to connect front end with back end.
- Followed team's MVP.

## Education

### School of Code. Remote Coding Bootcamp, Birmingham

NOVEMBER 2021 - MARCH 2022

Trained to industry standards through extensive focus on the fundamentals of software development, problem solving, pair-programming and agile project management. Regularly participated in hackathons and independent exploration into new technology by embracing challenges and pushing myself out of my comfort zone.
