Looking to deliver excellent web development skills. I consider myself creative persone, organized and self-motivated.

EDUCATION

2021-2022

School Of Code

A16-week intensive fulltime coding Bootcamp. The Bootcamp focused on Full-Stack (MERN) latest technologies. Real projects by Agile methodology in teams. Problem Solving,Pair Programming, Planing, Critical Thinking.

PROJECTS

One week project

A platform where user can keep all needed links. Full stack project using Node.js, Exppress, Postgresql, React,Cors. In this project I put my passion as designer into practice. I did UI reserch, the low and high fedelity in Figma. I spent a good part of our project working with CSS styling, creating components in React.

Final Project

Our plan and working process followed AGILE methodologies. We planned out our initial MVP and kept revisiting this as the project went on. Settings tripwires and having regular code reviews we kept on track. I put myself forward to work extra hours, and made sure I always was available to help other team members if they needed it. In this project I worked in back end using Node.js, created RESTfull API, Postgresql Data Base, Auth0. We used CRUD to create routes and deployment was done on Heroku.

EXPERIENCE

Hairdresser June 2015 - March 2021, London

- Build at least of 136 regular clients using social media Facebook, Instagtam.
- Consulting clients and analyzing their needs.
- Checking the stores inventory and ordering more suplies when store was running out.
